## Notice of Intent to Certify Sole Source

---

**To:** Interested Parties

**From:** Craig P. Orgeron, CPM, Ph.D.

**CC:** ITS Project Number 49274

Initial  
CPD

**Date:** February 10, 2026

**Re:** Sole Source Certification Number 4736 to provide support and maintenance of a migrant data system for the Mississippi Department of Education (MDE)

**Contact Name:** Jake Alexander

**Contact Phone Number:** 601-432-8090

**Contact E-mail Address:** [Jake.Alexander@its.ms.gov](mailto:Jake.Alexander@its.ms.gov)

---

### Sole Source Certification Award Details

Regarding Information Technology Services (ITS) Sole Source Certification Number 4736 for the Mississippi Department of Education (MDE), please be advised that ITS intends to award Management Services for Education Data, Inc. (MS/EdD) as the sole source provider of MIS2000 software support and maintenance through June 30, 2029, in an amount not to exceed \$90,612.00. Please be advised that ITS will determine if additional enhancements, upgrades, or support are within scope during the certification period, and may increase the spending authority accordingly. Should Management Services for Education Data, Inc. change their name during this certification period, then ITS will determine if a recertification is necessary. For an explanation regarding Mississippi state law, policy and procedures for sole source procurements, refer to Attachment B: Sole Source Procurement Overview.

### Sole Source Criteria

1. The product or services being purchased must perform a function for which no other product or source of services exists:

**Management Services for Education Data, Inc. (MS/EdD) designed MIS2000 as a Microsoft Windows and web-based solution for the information needs of states serving migrant children. The MIS2000 migrant data system offers desktop, web, and mobile solutions that can operate either online or offline and is completely customizable to the needs of the Mississippi migrant education program. No other system supports the fully offline recruiter functionality of MIS2000, and no other known system offers a complete interface with the federal Migrant Student Information Exchange (MSIX) system.**

**The uniqueness of the MIS2000 information system consists mainly of the following three features:**

- MIS2000 is the only migrant data system customized to the needs of each state. State migrant reports are utilized on this system and include migrant child counts, monthly service counts, and monthly new Certificate of Eligibility (COE) totals. MDE has the ability to request SNAP Reports from MIS2000. MDE also has the ability to create ad hoc reports through a report builder.
- MIS2000 is the only migrant data system that offers separate, integrated, and complete web and native/desktop applications. The entire MSIX MDE can be entered and maintained solely through either the desktop application or the web application. Any combination of the two is also an option.
- MIS2000 is the only migrant data system that combines a web-based system and a tablet system capable of full operation when disconnected from the internet. The MIS2000 tablet system is designed to function at remote field locations, such as farms, where no internet is available.

2. The purchaser must be able to show specific business objectives that can be met only through the unique product or services:

**The United States Department of Education (USDE) requires State Educational Agencies to report migrant data. MIS2000 has been used by MDE since 2003 and serves exclusively as its migrant data system for the collection and reporting of academic and health information on children of migrant workers in Mississippi. It fulfills all the federally mandated data and reporting requirements. Along with providing access to the system, MS/EdD also provides maintenance and support to the state and site locations, software enhancements, report development assistance, and tablet system with electronic capabilities.**

3. The product or services must be available only from the manufacturer and not through resellers who could submit competitive pricing for the product or services:

**MS/EdD is the original developer of the MIS2000 software and continues to be the only provider of this software and its support. MS/EdD is the only vendor that offers customization and ongoing unlimited modifications to the state system, as well as unlimited reporting at no additional cost. The Vendor's sole source certification letter is included as Attachment A.**

### Schedule

Task	Date
First Advertisement Date	02/10/2026
Second Advertisement Date	02/17/2026
Response Deadline From Objectors	02/24/2026 at 3:00 P.M. Central Time
Notice of Award/No Award Posted	Not before 02/25/2026

### Project Details

In 2003, ITS, on behalf of MDE, executed a Software License and Maintenance Agreement with MS/EdD as the sole source provider of the MIS2000 software system. In 2008, ITS executed another Software License and Maintenance Agreement to provide the MIS2000 software and support for five additional years. In December 2017, ITS began issuing Notice of Intents to Certify

Sole Source for MIS2000 software and support and has not received any objections/responses. Since 2003, MDE has been given approval to spend \$493,947.92 on this migrant data system.

### **Submission Instructions and Format of Response from Objecting Parties**

Interested parties who have reason to believe that the support and maintenance of a migrant data system should not be certified as a sole source should provide information in the following format for the state to use in determining whether or not to proceed with awarding the Sole Source contract to Management Services for Education Data, Inc.

#### **1.1 Interested Party Information**

1.1.1 Contact Name, Phone Number and email address

1.1.2 Company Website URL, if applicable

#### **1.2 Objection to Sole Source Certification**

1.2.1 Interested parties must present specific objections to the Sole Source certification using the criteria listed above.

1.2.2 A statement regarding the Interested Party's capabilities as related to this Sole Source Certification Request.

1.3 Comments will be accepted at any time prior to Tuesday, February 24, 2026, at 3:00 p.m. (Central Time) to Jake Alexander at [Jake.Alexander@its.ms.gov](mailto:Jake.Alexander@its.ms.gov) or at the Mississippi Department of Information Technology Services, 3771 Eastwood Drive, Jackson, Mississippi 39211. Responses may be delivered by hand, via regular mail, overnight delivery, e-mail or by fax. Fax number is (601) 713-6380. ITS WILL NOT BE RESPONSIBLE FOR DELAYS IN THE DELIVERY OF RESPONSES. It is solely the responsibility of the Interested Parties that responses reach ITS on time. Interested Parties may contact Jake Alexander to verify the receipt of their Responses. Responses received after the deadline will be rejected.

1.4 Interested Party responses should include the following information:

<p><b>SUBMITTED IN RESPONSE TO Sole Source Certification No. 4736-49274 Accepted until February 24, 2026 @ 3:00 p.m., ATTENTION: Jake Alexander</b></p>
---

If you have any questions concerning the information above or if we can be of further assistance, please contact Jake Alexander at 601-432-8090 or via email at [Jake.Alexander@its.ms.gov](mailto:Jake.Alexander@its.ms.gov).

Attachment B: Sole Source Procurement Overview

Attachment A

January 6, 2026

Dr. Judy K. Nelson Executive Director  
Mississippi Department of Education  
Office of Federal Programs  
B.O. Box 771, Suite 111  
Jackson, MS 39205

**Re: Sole Source Justification for the MIS2000 system  
Management Services for Education Data (MS/EdD)**

Dear Judy:

Management Service for Education Data (MS/EdD), an Arkansas based company, designed **MIS2000** as a Microsoft Windows- and web-based solution to the information needs of states serving migrant children. The system design focuses on a state database as opposed to a national database. This allows the system to be tailored to the unique information needs of a given state.

**Uniqueness of Goods and Services offered**

The uniqueness of the MIS2000 information system consists mainly in the following three features:

1. MIS2000 is the only migrant data system customized to the needs of multiple states.
2. MIS2000 is the only migrant data system that offers separate, integrated, and complete web and native/desktop applications. The entire MSIX MDE can be entered and maintained solely through either the desktop application or the web application. Any combination of the two is also an option.
3. MIS2000 is the only migrant data system that combines a web-based system and a tablet system capable of full operation when disconnected from the internet. Our tablet system is designed to function at remote field locations such as farms where no internet is available.

MIS2000 is tailored to the exact needs of each state. Currently, the MIS2000 system is used by thirty-six states and no two states maintain exactly the same data. Each state can define information relative to their program without regard to whether other states maintain this information. The alternative is to utilize the "one size fits all" approach where information is the same for all states irrespective of their unique needs. Tailoring of the system is a unique feature not offered by competing software vendors.

**Provision of Technical Assistance and Customer Service**

MS/EdD provides toll free technical support from 8:00 a.m. until 5:00 p.m. Monday through Friday. In addition, as state needs change, the technical support staff will modify the installed system

## Attachment A

to accommodate the addition, deletion, or modification of any information requested by the state and there is no additional charge for these services. There is no limit to the number of change requests.

In addition to standard technical assistance, MS/EdD offers unlimited assistance in the development of reports. Although the MIS2000 system includes a reporting feature that enables users to develop their own reports, at the users' request, MS/EdD will develop reports and install them on the system. Once installed, the user can specify any selection criteria (date range, selected schools, etc.) relative to the particular report and produce it as often as necessary. There is no additional charge for this service and users can request an unlimited number of reports.

**Must be substantially related to the intended use, purpose, and performance of the service being sought.**

MIS2000 has been in service for almost twenty years and serves exclusively as a migrant data system. It meets the needs of over twenty states. It fulfills all of the federally mandated data element and reporting requirements.

**Other vendors do not offer services as outlined below.**

- \* A system that is designed exclusively to accommodate the collection and processing of academic and health information on migrant children as defined by the individual state and to continue to provide customization services resulting in changes to the system on an ongoing basis at no additional cost to the state.
- \* Unlimited development of requested reports also at no additional charge to the state.
- \* A reporting environment to monitor the accurate, complete, and timely reporting of information on the migrant student.

**Sole Source for COE Software for Tablets/Laptops**

**Tablet PC Software:**

MS/EdD was the original developer of the MIS2000 software and continues to be the only provider of this software. Therefore, our company (Management Services for Education Data) is the sole source for both the server, PC, and Tablet versions

Currently, we are the only vendor that offers customization as outlined above and ongoing unlimited modifications to the state system as well as unlimited reporting at no additional cost. If other information is required to process the contract, please contact me at (501) 801-2500. We sincerely appreciate your assistance with the contract renewal and look forward to working with you and others in the education department in providing services to migrant children

Sincerely,

Victor Oliver, President  
Management Services for Education Data

## Attachment B

The acquisition of information technology for all state agencies and institutions of higher learning (IHLs) is within the scope of the ITS law, found in Mississippi Code Section 25-53-1, et seq., and the policies and procedures established in accordance with this statute, found in the ITS Procurement Handbook posted on the ITS website ([www.its.ms.gov](http://www.its.ms.gov)).

ITS enabling legislation requires that information technology hardware, software and services be acquired in a manner that insures the maximum of competition among all manufacturers and suppliers of such equipment and services. Accordingly, ITS promotes full and open competition through the issuance of open specifications and the objective evaluation of Interested Party proposals to determine the lowest and best offering to meet an agency's or public university's business requirements. True competition protects the integrity and credibility of purchasing in the public sector and is essential in providing best value and adequate contractual protection for the purchasing entity. In certain limited situations, information technology acquisitions may be sole-sourced.

ITS utilizes the provisions of Public Purchasing Law for Sole Source and Emergency procurements of information technology. Mississippi Public Purchasing Law (Mississippi Code Section 31-7-13) specifies that noncompetitive items available from one source only be exempted from bid requirements (sole-sourced). ITS statute, in Section 25-53-5 (p), permits ITS to utilize provisions in Public Purchasing Law or regulations, when applicable.

Per Public Purchasing law, acquisitions must meet the following criteria to be authorized as sole source:

1. The product or services being purchased must perform a function for which no other product or source of services exists,
2. The purchaser must be able to show specific business objectives that can be met only through the unique product or services, AND
3. The product or services must be available only from the manufacturer and NOT through resellers who could submit competitive pricing for the product or services. The vendor's correspondence regarding this criterion for this project is included as Attachment A.

By policy as documented in the ITS Procurement Handbook, acquisitions of IT services must include the following information to be authorized as sole source:

1. An explanation about why the amount to be expended is reasonable, and
2. An explanation regarding the efforts by the purchaser to obtain the best possible price.

For state agencies, approval of all technology purchases with a lifecycle cost of \$5,000 or less, including sole source purchases, has been delegated to the agency. The ITS Procurement Limits Policies for Agencies (a section in the ITS Procurement Handbook) require a minimum of two competitive written bids or proposals for technology purchases with a lifecycle cost over \$5,000 but not over \$75,000 (not over \$25,000 for projects funded by the American Recovery and Reinvestment Act). Since, for single source items, the procuring agency will be unable to obtain two written bids, ITS must certify all sole source acquisitions of information technology with a lifecycle cost greater than \$5,000.

Institutions of Higher Learning (IHLs) or public universities have been delegated the authority to certify sole source procurements up to \$250,000 lifecycle cost under the ITS Procurement Limits Policies for IHLs (a section in the ITS Procurement Handbook). For the certification of sole source procurements delegated to the CIOs at public universities, the public university must follow ITS' Sole Source Procedure, including advertisement of the intent to award as sole source. Institutions certifying a sole source purchase must ensure the criteria listed above are met and documented in writing by the institution and the Interested Party prior to certifying a product or service as sole source. Sole source documentation must be reviewed and approved by the IHL's CIO for any sole-source certification above \$5,000. All sole source documentation should be retained in the public university's procurement file. Sole source requests above \$250,000 lifecycle cost require ITS approval.

Other than the delegations outlined above, all sole source technology procurements must be certified by ITS.

ITS thoroughly reviews Sole Source Certification Requests, determining if competing products and/or services exist. If so, ITS conducts a competitive procurement. If ITS' review confirms the sole source, then a Sole Source advertisement is issued, giving other Interested Parties an opportunity to identify competing products and/or services. Based upon the results of the Sole Source advertisement, ITS will either certify the request as a sole source or conduct a competitive procurement.
